VELOX®

THINK CYBER SECURITY...THINK VELOX

AI DRIVEN

UNIFIED ENDPOINT SECURITY MANAGEMENT

INNOVATIVE FEATURE

AI-DRIVEN THREAT DETECTION

ADAPTIVE SECURITY POWERED BY ARTIFICIAL INTELLIGENCE.

USER-FRIENDLY INTERFACE
SIMPLIFIED SECURITY MANAGEMENT.

SCALABLE & FLEXIBLE SUPPORTS

DIVERSE IT INFRASTRUCTURES.

ZERO TRUST FRAMEWORK – CONTINUOUS AUTHENTICATION & VERIFICATION.

ADVANCED ENCRYPTION & PRIVACY CONTROLS – ENHANCED DATA PROTECTION.

VELOX®
THINK CYBER SECURITY...THINK VELOX

AI DRIVEN

PlanetGuard™

UNIFIED ENDPOINT SECURITY MANAGEMENT

SecureIT – End Point Protection (EPP), is a cyber security solution, that continuously monitors and responds to mitigate cyber threats. Our solution's primary focus is on detecting and investigating suspicious activities and traces of such other vulnerabilities on your hosts/endpoints. SecureIT - Endpoint Detection and Response solution works by monitoring endpoints, network events, and recording the information in a central database. Further steps involving the analysis, detection, investigation, reporting, and alerting also takes place.

KEY CHALLENGES IN ENDPOINT SECURITY

Multiple Security Agents	High CPU, RAM, and Disk usage
Fragmented Management	Multiple dashboards and vendors
Complex SLA Management	Challenges in coordinating different OEMs
Slow Incident Response	Delayed action due to non-integrated solutions
High Costs	Redundant systems increase CAPEX & OPEX
Network Bandwidth Overload	Redundant systems increase CAPEX & OPEX
Inconsistent Reports	Compromised decision-making due to disjointed data

WHY PLANETGUARD UESM?

One Solution. One Agent. One Dashboard

* Single Security Agent – Eliminates the need for multiple security tools.
* Unified Dashboard & Role-Based Access – Centralized control and visibility.
* Optimized Resource Consumption – Lower CPU, RAM and Disk Usage.
* Real-Time Reports & Compliance Management – Instant MIS & DSS insights.
* Integrated Threat Detection & Response – AI-driven analytics for proactive security.
* Advanced Threat Intelligence – Predicts and mitigates cyber risks.
* Lower Total Cost of Ownership (TCO) – Reduced hardware and operational costs.

Endpoint Detection & Response (EDR)
Real-time monitoring & threat mitigation

Extended Detection & Response (XDR)
Cross-platform security intelligence

Application Control
Whitelisting & blacklisting to prevent unauthorized access

Full Hard Disk Encryption (FHDE)
Secure encryption to comply with DPDP

Patch Management
Updates for security patches & fixes for OS and applications

Next-Gen Antivirus
AI-enhanced malware and zero-day threat detection

File Integrity Monitoring
Verifies the authenticity and integrity of the files

IT Asset Management (ITAM)
Visibility & control over IT infrastructure

Data Leak Prevention (DLP)
Protects sensitive data from breaches

Threat Intelligence Platform (TIP)
Predictive analytics for cyber resilience

Remote Device Management
Access your endpoint through a secure channel

Centralized Content Distribution
Deliver content to Networked Endpoints in an organization
